

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer / Full Stack Developer position at your organization. With over 1 year of hands-on experience in full-stack development, I have built and deployed scalable web applications using technologies such as Java, React.js, Node.js, and AWS.

In my current role at Jhaishna Technology Pvt. Ltd., I have been responsible for developing responsive front-end modules and optimizing application performance. Previously, at VTS Enterprise India Pvt. Ltd., I designed and deployed multiple user interfaces and backend services, improving system efficiency and reducing deployment time through automation and cloud-based solutions.

I have also developed impactful projects such as an HRMS Portal with role-based access, employee tracking, and AI-driven features, as well as a Fair Price Shop Management System that improves transparency and efficiency in public distribution systems. These experiences have strengthened my ability to design user-centric applications and deliver high-quality solutions.

I am particularly interested in this opportunity because it aligns with my passion for building scalable applications and continuously learning new technologies. I am confident that my technical skills, problem-solving ability, and commitment to excellence will make me a valuable addition to your team.

I would welcome the opportunity to discuss how my skills and experience can contribute to your organization. Thank you for considering my application.

Sincerely,

Eepi Deva Kalyan
