

Devakalyan Eepi

Objective:

Seeking a challenging role as a **Software Engineer / Full Stack Developer** where I can leverage my expertise in **Java, React.js, Node.js, and modern web technologies** to build scalable, high-performance applications. I aim to contribute to business growth by developing innovative solutions and ensuring efficient system performance.

Professional Summary:

Proficient Software Engineer with **1+ years of experience** in full-stack development. Skilled in building responsive front-end applications using **React.js, HTML, CSS, and JavaScript**, along with developing scalable backend systems using **Java, python, Node.js, Express.js, and Spring Boot**. Experienced in **cloud deployment (AWS)**, database optimization, and creating high-performance applications. Strong team player with excellent problem-solving skills and a passion for learning new technologies.

Technical Skills:

- **Programming Languages:** Java, JavaScript, Python(Basic)
- **Front-End:** React.js, HTML, CSS, Bootstrap
- **Back-End:** Node.js, Express.js, Spring Boot, Flask
- **Databases:** MySQL, MongoDB, SQL
- **Tools & Technologies:** Docker, AWS, REST APIs, Git, GitHub
- **Operating Systems:** Windows, Linux (Basic)

Certifications:

- Java Full Stack | ISM (2023)
Gained expertise in React.js, Node.js, MySQL, and full-stack application development.
- Essentials of Java & HTML | DigiSakshyam by Microsoft (2022)
Developed foundational skills in Java programming and front-end design.
- India Skilled PRO JAVA (2024)
Advanced knowledge in Java with practical implementation in web application projects.
- Live Masterclass on Claude AI (2024)
Explored AI-powered tools and their application in real-world problem-solving.
- Investor Awareness Program | Launchpad (2022)

Professional Experience:

Jhaishna Technology Pvt. Ltd., Vijayawada
Software Engineer
April 2025 – Present

- Designed and developed **10+ responsive front-end modules** using React.js, improving user experience and reducing page load time by **20%**
- Built and optimized scalable application components, enhancing overall system performance by **25%**
- Collaborated with cross-functional teams to support **end-to-end deployment cycles**, ensuring smooth

and timely releases

- Identified and resolved **critical bugs and performance issues**, improving application stability and reducing downtime by **15%**
- Conducted testing and debugging processes to enhance code quality and maintain high-performance standards
- Contributed to improving workflow efficiency by assisting in **process optimization and feature enhancements**

VTN Enterprise India Private Limited

Junior Software Engineer

Feb 2024 – March 2025

- Designed and deployed 20+ responsive front-end interfaces using React.js, enhancing user engagement and reducing interface loading time by 25%.
- Engineered 10+ cluster-based projects on cloud platforms (AWS, Azure), reducing development cycles by 20% and increasing system reliability.
- Improved database query efficiency by 15% through optimization techniques, leading to faster system performance.
- Built and maintained 5 scalable back-end data-processing systems using Node.js and Express.js, supporting high-traffic applications.
- Implemented automation tools for development pipelines, streamlining workflows and reducing deployment time by 30%.
- Collaborated with cross-functional teams to deliver tools that enhanced team productivity and client satisfaction.

Education:

- **B. Tech in Electronics and communication Engineering** (Eswar College of Engineering | 72% | 2023)
- **Intermediate** (Sri Surya Junior College | 63% | 2019)
- **SSC** (Zilla Parishad High School | 8.5 GPA | 2017)

Strengths:

- Adaptable to any environment or situation
- Quick learner with a strong eagerness to acquire new skills
- Focused, goal-oriented, and a team player

Projects:

1.HRMS Portal

- Developed a comprehensive **HR Management System** with role-based access
- Implemented employee tracking and attendance modules
- Built responsive UI using **React.js, Bootstrap, HTML/CSS** (30% performance improvement)
- Developed backend APIs using **Python Flask** with SQL database
- Added **AI-based features** for leave prediction and performance alerts
- Deployed using Docker and AWS

Tech Stack: React.js, Flask, SQL, Bootstrap, Docker, AWS

2. FPS Fair Shop Management System

- Developed a Fair Price Shop Management System to digitize ration distribution
- Implemented modules for stock management, customer records, and transaction tracking
- Built responsive frontend using React.js and Bootstrap
- Developed backend APIs using Node.js and Express.js
- Ensured secure authentication and role-based access (Admin & Shopkeeper)
- Improved efficiency and transparency in ration distribution

Tech Stack: React.js, Node.js, Express.js, MongoDB, Bootstrap

VTS Projects: -

1.Task Management System (MERN Stack)

- Developed a user-friendly task management application, enabling efficient task assignment and tracking across teams.
- Used React.js for the front-end, Node.js/Express.js for the back end, and MongoDB for data storage.
- Deployed the application on AWS, ensuring scalability and seamless performance.

2.Care Plus Hospital Management System (Java)

- Developed a hospital management system using Java.
- Implemented role-based authentication and dynamic dashboards for doctors, patients, and administrators.
- Integrated REST APIs for seamless data management and real-time patient records handling.
- Optimized backend services for better performance and scalability.
- Deployed the system on cloud platforms, ensuring security and efficiency
