

Results-driven Data Scientist with 2 years of experience delivering end-to-end AI/ML solutions, specializing in LLMs, NLP, document intelligence, and computer vision. Proven ability to lead large teams and deliver production-scale systems across multiple domains using Python, cloud platforms, and advanced ML frameworks.

Professional Summary:

Results-driven Software Engineer with 2 years of experience in full-stack development, specializing in designing, developing, and deploying scalable web applications. Proficient in front-end technologies (React.js, HTML, CSS, JavaScript, Python) and back-end frameworks (Node.js, Express.js, Spring Boot). Experienced in database management using MySQL and MongoDB, and deploying applications on cloud platforms such as AWS, Docker, and Azure. Skilled in integrating AI/ML solutions, including LLMs and NLP models, to enhance application intelligence. A strong collaborator with excellent problem-solving skills and a commitment to delivering high-performance, business-aligned solutions.

Technical Skills:

- **Programming Languages:** JavaScript, Python, Java
- **Front-End:** React.js, HTML, CSS
- **Back-End:** Node.js, Express.js, Spring Boot, Django, Flask
- **Databases:** MySQL, MongoDB
- **Deployment:** AWS, Docker, Azure, RESTful Services
- **AI/ML:** LLMs, NLP

Certifications:

- Python Full Stack | ISM (2023)
Gained expertise in React.js, Node.js, Django, Flask, MySQL, and full-stack application development.
- Essentials of Python & HTML | DigiSakshyam by Microsoft (2022)
Developed foundational skills in Java programming and front-end design.
- India Skilled PRO JAVA (2024)
Advanced knowledge in Java with practical implementation in web application projects.
- Live Masterclass on Claude AI (2024)
Explored AI-powered tools and their application in real-world problem-solving.
- Investor Awareness Program | Launchpad (2022)

Professional Experience:

Jhaishna Technology Pvt. Ltd., Vijayawada Software Engineer

April 2025 – Present

- Developed and deployed 20+ responsive web interfaces using Python, improving user engagement and reducing load times by 25%.
- Designed and managed cloud-based solutions on AWS and Azure, cutting development cycles by 20% and boosting system uptime.
- Optimized database performance using AI-driven query analysis, achieving a 15% boost in efficiency and system responsiveness.
- Built and maintained 5 high-performance backend systems with Node.js and Express.js to

support large-scale data operations.

- Automated CI/CD workflows, reducing manual deployment efforts and delivery time by 30%.
- Collaborated with cross-functional teams and utilized AI collaboration tools (e.g., GitHub Copilot, ChatGPT, Jira AI) to improve development speed, code quality, and client satisfaction.

VTS Enterprise India Private Limited

Junior Software Engineer

February 2024 – March 2025

- Designed and deployed 20+ responsive front-end interfaces using React.js, enhancing user engagement and reducing interface loading time by 25%.
- Engineered 10+ cluster-based projects on cloud platforms (AWS, Azure), reducing development cycles by 20% and increasing system reliability.
- Improved database query efficiency by 15% through optimization techniques, leading to faster system performance.
- Built and maintained 5 scalable back-end data-processing systems using Node.js and Express.js, supporting high-traffic applications.
- Implemented automation tools for development pipelines, streamlining workflows and reducing deployment time by 30%.
- Collaborated with cross-functional teams to deliver tools that enhanced team productivity and client satisfaction.

Education:

- **B. Tech in Electronics and communication Engineering** (Eswar College of Engineering | 72% | 2023)
- **Intermediate** (Sri Surya Junior College | 63% | 2019)
- **SSC** (Zilla Parishad High School | 8.5 GPA | 2017)

Strengths:

- Adaptable to any environment or situation
- Quick learner with a strong eagerness to acquire new skills
- Focused, goal-oriented, and a team player

Projects:

Project 1: HRMS Portal

- Developed and enhanced an HR management system integrating role-based access, employee tracking, and attendance modules.
- Built responsive frontend components using React.js, Bootstrap, and HTML/CSS, improving performance and UX by 30%.
- Implemented Python Flask APIs with SQL-based backend for data management and analytics.
- Integrated basic AI-driven automation for leave prediction and performance alerts.

Tech Stack: React.js, Flask, SQL, Bootstrap, Docker, AWS

Project 2: Automated Data Validation System (AI Augmentation)

- Designed a small-scale automation module for validating and preprocessing client data before upload.
- Utilized Python and LLM-based API validation to identify formatting inconsistencies and missing data.
- Enhanced data accuracy by 20%, improving backend reporting efficiency.

Tech Stack: Python, OpenAI API (or any LLM-based API), CSV, Excel, JSON. Regex, JSON Schema, Custom Validation Scripts

VTS Enterprise India Private Limited

Project 1: Task Management System (MERN Stack)

- Developed a user-friendly task management application, enabling efficient task assignment and tracking across teams.
- Used React.js for the front-end, Node.js/Express.js for the back end, and MongoDB for data storage.
- Deployed the application on AWS, ensuring scalability and seamless performance.

Project 2: Care Plus Hospital Management System (Python, Django)

- Developed a hospital management system using Python & Django.
- Implemented role-based authentication and dynamic dashboards for doctors, patients, and administrators.
- Integrated REST APIs for seamless data management and real-time patient records handling.
- Optimized backend services for better performance and scalability.
- Deployed the system on cloud platforms, ensuring security and efficiency
